

CHAT BOT CHALLENGE

22nd - 23rd July 2017

Organized by
ATMECS TECHNOLOGIES PVT LTD

About Event

Chatbots are a new and improved medium for businesses and users to interact with each other. Chatbots are more personal, don't require installation and come in a familiar UI. The era of messaging has arrived along with a botpocalypse, but few people have seen examples that go beyond the personal assistant, travel butler, or shopping concierge. The aim is simple - encourage everyone (not just the developers) to come up with ideas for building disruptive bots for enterprise.

22-23
JULY

CHAT BOT CHALLENGE

The objective is to encourage everyone (not just the developers) to come up with ideas for building disruptive bots for enterprise.
