SMART SENSING HACKATHON

Last Date Of Registration : 1st February, 2022

Prizes

1st Prize: 1000 USD | **2nd Prize: 500 USD**

Apply Now

This hackathon aims to find solutions in two different approaches which are categorized in two sub-themes, (a) to analyse satellite imagery data to estimate the pollutants in a given area, and (b) to discover new innovative solutions for developing smart air quality monitoring systems by integrating sensor technology with machine learning algorithms.
