

# THE JAMES DYSON AWARD

National winner

₹5,01,500

International runners up

₹5,01,500

Sustainability winner

₹30,09,190

International winner

₹30,09,190

## DESIGN SOMETHING THAT SOLVES A PROBLEM

Engineers who follow an iterative design process. The judges – and James Dyson especially – are drawn to designs that employ clever yet simple engineering principles and address clear problems. As well as proving your project's technical viability, we'd also love to see that it's commercially viable, too – so include any research you've done into manufacturing costs and retail prices.

**Application deadline: 6 July, 2022**
