DRONACHARYA
College of Engineering

Summer Training On Flutter

10th June – 19 July 2019

Flutter Intro: Flutter allows you to build beautiful native apps on iOS and Android from a single codebase. It means one code will result in an app with multiple device support. This develops the centralization of your whole project which eases the development and service process.

Shreya Kumari - Team Head

4th Year CS&IT undergrad who is interested in trying out all the different permutation and combinations of technology and learning them.

About Us

Gaurav Kumar - Tech Assistance
